

The world is focusing on sustainability, RSPO is one of the sustainable certifications

# PPP GREEN COMPLEX COMPANY ACHIEVES THE ROUNDTABLE ON SUSTAINABLE PALM OIL (RSPO) CERTIFICATION AWARDED BY SGS

## CASE STUDY

**BE THE BENCHMARK**

**BACKGROUND**

PPP Green Complex is a joint venture company between 3 leaders in Thailand’s comprehensive and sustainable palm oil industry: Tha Chang Oil Palm Industries Co., Ltd., PTG Energy Public Co., Ltd., RD Kasetpattana Co., Ltd. The joint venture was set up to accomplishing the Palm Complex Project and achieving its organizational vision, mission, values, goals.

**VISION:**

- PPPGC, the nation’s no.1 partner in Thailand’s comprehensive sustainable palm oil industry

**MISSION:**

- Provide quality products for the highest satisfaction of our customers

- Promote business partnership in Thailand’s comprehensive sustainable palm oil industry with our suppliers
- Maximize returns through optimized business productivity and continuous improvement for our shareholders
- Develop human resources for career growth in a conducive work environment for our employees
- Conduct business responsibly for sustainable development of the environment and society

**VALUES:**

- Pure — Operate under good corporate governance
- Proactive — Anticipate change and strive for excellence

- Passion — Attend to all process and take charge for the best results
- Growth — Pursue growth and continuous learning
- Customer service — Understand our customers’ needs and serve them for their utmost satisfaction

**GOALS 2020-2024:**

- Achieve 100% manufacturing capacity rate
- Produce and deliver the highest quality products, and become customers first choice supplier of palm oil products
- Create excellent employee workplace environment

**ABOUT THE PALM COMPLEX PROJECT**

Established in year 2014, PPP Green Complex was designed to be Thailand’s 1st comprehensive oil well. Built on a 1,000-rai piece of land located in the palm plantation areas of Bangsaphan Noi, Prachuap Khiri Khan Province, integrating zero waste management systems into each stage of its production, PPP is commercially operational since year 2019. The zero-waste management focuses on eliminating waste through reuse and recycling of all the waste generated. The palm complex would help support palm oil growers; raise the standard and improve the sustainability of palm oil industries; produce renewable energy; and promote Thailand’s sustainability.

*“I am deeply pleased and honored to receive the RSPO certification, and on behalf of PPP Green Complex Co., Ltd., would like to thank SGS (Thailand) Ltd. for the certification service support provided. This achievement proves our staff’s ability, potential, determination, and knowledge for implementing RSPO requirements. It demonstrates our commitment to developing a sustainable palm oil production management system enabling us to offer palm oil customers with the One Stop Service; gain a competitive advantage; open up new business opportunities while promoting the well-being of society and the environment.”*

**MR. Chaitasn Wanchai - Chief Executive Office**

# A GLOBAL STANDARD FOR SUSTAINABLE PALM OIL

## ABOUT RSPO CERTIFICATION

Palm oil is certified according to specific criteria from the Roundtable on Sustainable Palm Oil (RSPO), a not-for-profit association established in 2004 with the objective of promoting growth and use of sustainable palm oil products through credible global standards and engagement of stakeholders. The RSPO set sustainability guidelines to limit the impact of palm oil production on the environment, and the RSPO certification is an assurance to the customer that the standard of palm oil production is sustainable.

## THE BENEFITS OF RSPO CERTIFICATION

RSPO certification gives the opportunity to position PPP Green product as being sustainably produced. With consumers increasingly demanding sustainably produced products, ensuring its palm oil is RSPO certified offers them the right choice.

By becoming certified to RSPO, PPP Green Complex will be able to:

- addresses client needs and meets their expectations regarding commitment to sustainable palm oil products.
- promote the growth and use of sustainable palm oil
- better utilize resources and systematic management practices which can lead to improved productivity and increased business opportunities
- demonstrate transparency and credibility of the supply chain
- gain customer trust leading to increased revenue
- reduce the negative impacts of palm oil cultivation on the environment and communities, thus, demonstrating organization commitment to protecting environment and producing certified sustainable palm oil.

## HOW TO GET THE RSPO CERTIFICATION / THE PROCESS IN OBTAINING THE RSPO CERTIFICATION THROUGH SGS

- Training: Contact SGS for training on interpreting the requirements of the Standard
- Pre-audit (optional): If you are already certified to any food safety or quality management system standards, contact SGS for a pre-audit
- Certification audit: Contact SGS for a certification audit

There are **four basic requirements** to be met before an RSPO certified organization can use the **RSPO trademark logo**:

1. RSPO Member
2. Supply chain certified
3. At least 95% of all palm-derived components in the product are RSPO certified
4. Granted RSPO Trademark License

## SGS SERVICES

SGS is a renowned and credible certification body, recognized for its emphasis on quality and deep technical knowledge and skills.

SGS services are built on a flexible, pragmatic, and structured approach, and have been designed to help you achieve conformance with the RSPO: 2012 standard, and to ensure a positive customer the excellence experience. Our services include;
